SATURDAY, JANUARY 20
Adapting to the Changing World of Office Based Anesthesia”

Presented by Dr. Deepak Krishnan, DDS, FACS

This course provides 8 hours of CE credit and fulfills the Board of Dentistry’s 4-hour biennial CE requirement for the sedation permit.
The environment for office based anesthesia, especially the operator-anesthetist model, faces many challenges now and in the future, including but not limited to:

- The liability, legal, and legislative environment for dental office based anesthesia is becoming more challenging.

- The competitive business environment from other practice models and the pressures of declining insurance reimbursement is increasing.

- The aging of the population, increasing medical complexity of patients, and growing lists of medications and drug interactions.

- Worsening drug shortages.

- The opioid addiction and abuse crisis.

- Increasing difficulties in residency programs getting adequate anesthesia training for their residents.

- Increasing post-graduate training requirements, especially in regard to emergency preparation, but also for new anesthetic agents and techniques.

- Increasing patient expectations for adequate pain control, sedation, and anesthesia.

Dr. Deepak Krishnan, DDS, FACS is a dynamic, entertaining, and popular up-and-coming speaker on the national dental anesthesia lecture circuit. He is speaking for FDSA for the first time, and brings a fresh perspective on current and pertinent issues facing dentists and oral surgeons practicing office based sedation and general anesthesia.

Dr. Krishnan is director of the University of Cincinnati’s Oral and Maxillofacial Surgery residency program. He is an associate professor of Surgery at the College of Medicine, University of Cincinnati, where he teaches and maintains a private practice. He is past president of the Ohio Society of Oral and Maxillofacial Surgeons, and current president of the Ohio Dental Society of Anesthesiology.

Dr. Krishnan’s clinical and research interests are in ambulatory anesthesia, anesthesia and surgical simulation training, orthognathic and reconstructive surgery, and trauma and pediatric surgery. He brings a new thought provoking voice to the current and future issues facing dental providers of office anesthesia.
SATURDAY SCHEDULE

7:00–8:00 a.m. ........................................... Check-in and Continental Breakfast
8:00–10:00 a.m. ............................................. Lecture

**FDSA MISSION**

To affiliate in one organization those dentists who are especially interested in anesthesiology, and anxiety and pain control.

To continually raise the standards of practice of dental anesthesiology to ensure that the highest standard of care is provided to the public.

To advance the art and science of pain and anxiety control as an integral part of dentistry.

To promote and sponsor scientific and educational seminars for the continuing education of the membership.

To meet for the purpose of exchanging information and report progress in the field of anesthesia and pain control.

To represent dentists engaged in the practice of office anesthesia to the public, to other professional organizations, and before regulatory agencies.
